Pattern Engineering, Grading, Marker Planning and Plotting Outsourcing

Your **Partner** in **Growth.**

REACH

Enabling soft goods
business globally.

REACH Technologies is a leading Information Technology solutions provider for the sewn products Industry. With its expertise in packaged products, custom solutions, consulting services and offshore development facilities, REACH Technologies is poised to offer the global sewn product business an unmatched competitive advantage by maximizing the India talent and cost advantage for resource intensive processes like Pattern Engineering, Grading and Marker Planning.

Re-invent your Supply Chain.
Profit from outsourcing.

The sewn products industry has been on the cusp of a technology revolution for several years now.

Fashion product development is complex because it is geographically splintered across the world and fashion products are, by definition, short life cycle products. The geographically decentralized nature of the sewn products industry has given it cost advantages but additional headaches of co-ordination, reliability, and consistency.

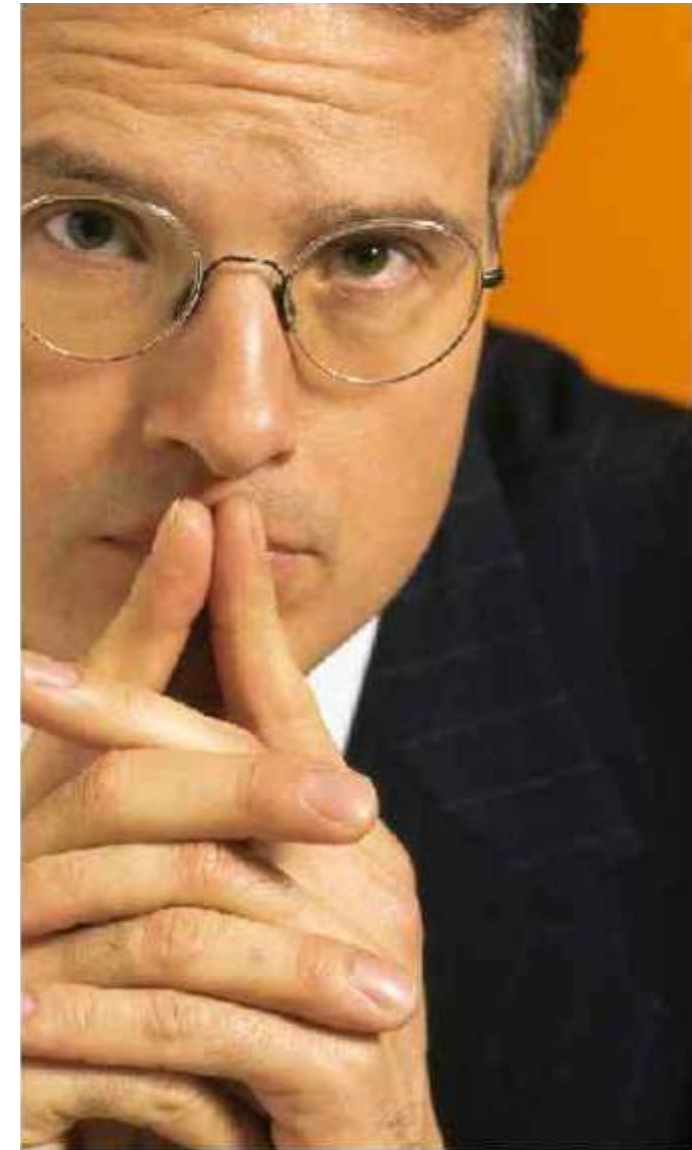

Cut down on your
pre-production expenses,
by outsourcing.

Managing multiple teams to work collaboratively, ensuring that everyone is on the same page is highly challenging and, at present, notoriously inefficient. Really short mind- to -market times, critical to earning profits from a fashion product, make the product development process even more challenging.

Global material outsourcing was pioneered by the sewn products industry and, today, cut and make outsourcing is a well oiled machine offering benefits to all supply chain partners.

Strategic use of IT in product development processes like Pattern Engineering, Grading and Marker Planning will offer significant advantages in standardization, costs and time cycles.

REACH BPO,
One Source for all your
Patterning needs.

REACH BPO, the specialized arm of REACH Technologies offers 24X7 outsourcing capabilities in:

- ✓ Pattern Engineering
- ✓ Pattern Grading
- ✓ Marker Planning
- ✓ Plotting / Remote Plotting

SupplyChainAdministration and Event Tracking outsourcing services will be offered in the near future.

Pattern Engineering

At REACH BPO our specialist pattern masters will evaluate and plan the pattern engineering phases with your product development team based on the design specifications and sketches provided.

We can deliver finished patterns globally as hard copies or in digital formats.

Our experienced pattern engineers have designed patterns for brands/ organizations like Ann Taylor, DKNY, Geoffrey Bean, Next, Anibaldi & Derosa and GAP to name a few.

Pattern Grading

At REACH BPO our pattern masters are experts at grading Men's, Ladies and Children's Outer as well as Innerwear.

Customized software tools that enable knowledge management will ensure that you get accurately graded patterns on time.

Marker Planning

50 to 80% of apparel-manufacturing costs is fabric cost. Any savings in fabric usage has a significant impact on product line and organizational profitability.

Tight (efficient) markers are best made by visualizing the various pattern pieces on a computer by those who are trained on spatial visualization techniques and not on a table.

REACH BPO will help you save sufficient quantities of fabric by combining skills of experienced marker planers with cutting edge software tools.

We can deliver efficient markers globally 24x7 to your manufacturing units.

Plotting

Using state of the art plotters we can plot full-length markers as well as the base and graded patterns as per scale.

We can deliver excellent plotting outputs globally 24x7 to your manufacturing units.
