

COMPUTERIZED AUTOMATIC INDUSTRIAL FABRIC CUTTING MACHINE

NFC Series
Model No. 8082

Discover the versatility of our fabric cutters, designed to adapt to various fabric cutting tasks with their multi-functional and flexible capabilities, offering a well-rounded solution.

Experience the enhanced performance of our fabric cutters, equipped with improved technology and refined features that result in precise and superior fabric cutting, delivering exceptional results.

Our fabric cutters are driven by precision, focusing on accuracy and paying meticulous attention to detail, ensuring exact and meticulous fabric cutting for flawless outcomes.

Maximize productivity with our efficient fabric cutters, saving time and streamlining the fabric cutting process with effective and optimized performance that boosts workflow efficiency.

Air Pressure	8 KPS
Cutting Thickness	Max 75 mm
Cutting Tolerance/ Accuracy	±0.1mm - 10.0mm
Cutting Speed	1500-2000mm/s
Cutting Type	Straight Knife continuous Up-down Cutting
Dimension	5900*3150*1700mm
Format Support File	.dxf, .png, .jpg, .psd, .cdr
Interface	Ethernet
Machine Power	25 KW
Operating Temperature	750°C
Software	Automatic cutting system Copyright
Voltage	AC 110V/220V
Weight	4200kg
Working Area	2000×3500mm
