Self-evaluation Test

Will Hurt . . . and Help !

This test will **hurt** if you take it honestly.

This test will **help** if you use it as an evaluation tool (as it is intended to be).

Self-evaluation 1

Does your Cut Planner go on leave sometimes?

When he/she does go on leave, does it have an impact on Order execution time?

Is there a possibility of his/her leaving the Organization sometime?

When he/she leaves, will it hurt?

Will he/she walk away with the knowledge and skills?

Does your Organization have mechanisms to translate Individual Knowledge to Organizational Knowledge?

Your Benefit 1

Deskills Cut Planning

You no longer need to depend on your skilled Cut Planner.

REACH Cut Planner effectively transfers the skills from an individual to your Organization.

Safeguards against employee turnover.

Self-evaluation 2

Do you believe you could have improved your net profit last year with better process control?

Do you realize that 60-80% of your apparel manufacturing cost is fabric cost?

Do you have a system to control processes in the Cutting Room?

Do you think you could save fabric by better process control in the Cutting Room?

Your Benefit 2

Significant fabric savings by reducing end-of-roll losses.

End losses can typically be significant.

Consider this:

An average loss of 90cm per end bit on an average roll length of 60m amounts to 1.5% fabric loss.

Self-evaluation 3

Do your Orders go late?

It is possible that delays in the Cutting Room also contributed to the Orders being shipped late?

How big is the 'true' loss when an Order is delayed (Take into account both Qualitative and Quantitative losses credibility, shaken customer loyalty, possible switching of customer to another supplier, marked down pricing, airlifting the shipment etc.) ?

Your Benefit 3

Gives you greater control of the processes in Cutting Room.

Self-evaluation 4

S	M	L	XL
128	164	247	103
Marker1	$S+M+L+XL$		→ 103
Marker2	$2M+2L$		→ 30
Marker3	$S+4L$		→ 21
Marker4	$4S+M$		→ 1

Do you realize that no Automated Nesting/Marker Planning software gives you the maximum possible efficiency?

Your Benefit 4

Identifies the Markers that are critical to overall fabric savings in the Cutting Room.

Self-evaluation 5

Have you ever done a fabric consumption audit?

Do you realize you can ensure better adherence to fabric saving procedures if you monitor the practices in the Cutting Room?

Do you realize that a comparative analysis of actual consumption and planned consumption of fabric will enable you to get a true picture of the profitability of each Order?

Your Benefit 5

Fabric Reconciliation module captures and analyzes data on actual fabric usage and compares this with calculated, expected fabric usage, thus essentially laying the basis for building operationally excellent practices in the Cutting Room.
